Company Profile of Alfen Consult GmbH

Ideas. Analysis. Strategy.
SUCCESS REQUIRES COMPETENCE

Company Profile

An innovative company with substantial experience in infrastructure development and management

Alfen Consult GmbH is a German-based company that offers cutting edge solutions through economic, financial and management advice.

Our fields of activities

We specialise in technical infrastructure such as transport and utilities, and social infrastructure such as education, health, accommodation and defence.

Our expertise

We provide innovative solutions for complex projects and challenging problems in infrastructure provision, management, risk modelling and finance of infrastructure. Our solutions are always project-specific and based on comprehensive fact finding, plurality of ideas, detailed analysis and multiple strategies.

Our core competencies

- Familiarity with the public sector, its structure, administration and processes
- Thorough understanding and management of interfaces between different disciplines and stakeholders involved in infrastructure projects
- Extensive knowledge in finance, business models and risk modelling
- Strong analytical and statistical skills.

Our particular strengths

As spin-off of the Bauhaus-Universität Weimar we particularly feel obliged to apply science-based, state-of-the-art and interdisciplinary consulting approaches and methods. To the same degree our vast practical project experience provides solutions in close cooperation with our customers. These solutions are relevant, tailor-made to their needs and ready to implement.

These capacities qualify us in many assignments to lead and steer interdisciplinary teams of consultants.
